

Enterprise Mobility Delivered, Serviced and Supported, for a Predictable Monthly Fee.

What is AO: HaaS?

AO: HaaS, the industry's first Hardware as a Service program (offered since 2007), makes it simple and affordable to obtain wireless, mobile computing, and data collection equipment for your business. Define your needs by telling us what equipment you need, when and where. Within days it will be configured, on-site and ready for use. Our program enables you to avoid large, upfront capital expenditures typically associated with equipment purchasing, by paying a practical monthly subscription fee for the entire solution. AO: HaaS covers all hardware, services, and support eliminating the need to have on-site IT staff to support your equipment. We can even bundle AO: HaaS with the software of your choice and roll it all into a single, predictable monthly cost. Plus, AO: HaaS includes no-fault warranty and over-night replacement because we understand that downtime is costly to your business.

AO: HaaS is an innovative Hardware as a Service (HaaS) program that provides you with all of your mobile computing, point-of-sale (POS), and bar code technology, including installation, service, and support, with ZERO capital expenditure, for a predictable monthly expense.

AccuCode takes on all the responsibility of servicing, managing, and maintaining your technology.

AO: HaaS means working, supported, managed technology, in the hands of your users, everyday, for a guaranteed cost.

Top Benefits for Your Business

With AO: HaaS, AccuCode takes the risk out the equation when it comes to acquiring, configuring, maintaining, and supporting technology. It's not your problem anymore. AccuCode takes on these tasks to ensure your employees have working devices when they need them. Check out some of the top reasons hundreds of customers love AO: HaaS.

- ✓ **Minimize Internal Resources:** You no longer need an IT superstar running or supporting your mobility project. When AO: HaaS is combined with Software as a Service (SaaS) applications, it means no servers and no in-house support costs, with 24x7x365 up-time.
- ✓ **Predictability:** No more budget surprises! You know exactly what it's going to cost to have working, supported, and managed devices in the hands of your employees day after day.
- ✓ **Speed:** With AO: HaaS your project doesn't have to take months or years to roll-out, it can be done in days or weeks, no matter how many devices or sites. You will be able to upgrade quickly and easily, so you will never be stuck with old, obsolete hardware again.
- ✓ **Flexibility:** Start small and see how it goes or roll out to your entire team. That is now up to you. We have several programs to fit every need; month-to-month, annual, and multi-year plans. You can scale up or down whenever you need to.
- ✓ **Reliability:** Line-of-business applications are mission critical. When they aren't available your employees can't do their jobs. AO: HaaS has been offered since 2007 and is designed to make sure your team always has working devices and access to all the information needed to make the right decisions.
- ✓ **No Large, Upfront Capital Expenses:** You don't need a big budget for your technology anymore, it becomes an operating expense. You will also save from the implementation, as AccuCode takes on all responsibility.
