

## *The Airline Industry's First Complete Mail Transportation Management Solution.*

### What is Velocity Mail?

In a world where the transportation of postal mail is increasingly measured, vMail gives you the control, visibility, and predictability you need to better track and manage your mail handling operations and performance. In compliance with USPS and UPU requirements, we offer you a complete solution of software, hardware, and 24-hour support, as well as services like project management, training, and implementation. We currently support thousands of devices deployed on over six continents, that interact with over forty postal authorities worldwide. With our pay-per-kilo model, our revenue is based on your revenue, which drives our continued investment in supporting the evolving needs of the postal and airline communities. Your success is our success.

“With a pay-per-kilo subscription model, AccuCode provides you with a predictable and cost effective mail tracking solution.”

*The Airline Industry's first on-demand, mail tracking and management solution, that not only ensures you comply with the USPS and International UPU requirements, but provides you with the control and visibility you need when optimizing your mail operations. With a pay-per-kilo subscription model, AccuCode provides you with a predictable and cost effective solution called Velocity Mail (vMail), which can be scaled up or down depending on the amount of mail you transport.*

## Top Benefits for Your Business

With vMail, tracking and managing your mail operations is easy and efficient. There is no need to worry about USPS or International UPU requirement amendments or changes, as we will always work to provide a compliant system to manage your mail. Check out some of the top reasons why over forty airlines globally use Velocity Mail, everyday.

- ✓ **USPS & International UPU Compliant:** vMail meets USPS and International UPU requirements for handling U.S. domestic, international and military mail, as well as foreign post international mail.
- ✓ **Future Proof:** We have a dedicated team and make significant investments every year to stay up-to-date with the latest standards, so you can be assured that your software will consistently be in compliance with the USPS and UPU standards as they continue to evolve.
- ✓ **Subscription Service:** You only pay for the volume of mail you transport. AccuCode charges a per-kilo fee that allows you predict your subscription costs as your volumes fluctuate.
- ✓ **Visibility:** Gain real-time visibility into your mail tracking and management operations. Access vMail anytime from anywhere there is an Internet connection.
- ✓ **Complete Solution:** With vMail, you will get all the needed software, hardware, services, and support from AccuCode.
- ✓ **Outsource IT Support:** With vMail, there are no servers, no third party software licenses, no internal IT resources, and no endless batch or update cycles. There is no more waiting, you get global deployment in days.
